SAVVY TECH PACKS

Apparel Development & Branding Tools for Emerging Brands

Helping Fashion Brands Move from Idea to Production

Savvy Tech Packs provides professional apparel development tools designed to help designers and startups communicate clearly with manufacturers.

Created by apparel technical designer Mabel Alarcon, these tech packs are built using real industry standards and production knowledge. Each tech pack includes measurement specifications, construction details, fabric information, and garment diagrams to ensure accurate production.

Why Branding Matters

Successful brands stand out through strong visual identity and consistent branding.

- Stand out in the market
- Look professional to buyers and manufacturers
- Build customer trust
- Create long-term brand identity
